Every Child Lives

Reach a child fund.

Thirty percent of Ugandans still live in poverty and yet 9% are food poor. Children suffer the most effects of poverty due to their dependency on others for care and support. Two in every 10 children aged 6-12 years never enroll in primary school while 60% miss secondary education, also 6 in every 10 children 6-24 years drop out of school due to the cost of education while 7% drop out of school due to unwanted pregnancies. This coupled with the child's high risk of sickness, affects the child's normal growth pathway. **At Mildmay Uganda, we aspire to see every child given a chance to live a fulfilling life.**

Today, Mildmay Uganda is reaching out to 40,024 children in our communities. Together with friends of Mildmay Uganda, we invest in enabling vulnerable children to access education, health, and basic child support. **We enjoy seeing them in school, healthy, and happy —our impact.**

Our child's story: Mildmay Uganda and partner friends have worked together since 1998, to save the lives of children affected by diseases and poverty effects to reach their life potential. Today many have graduated from school and are leaders in their communities. **quality of life created through friendship.**

Be part: Our purpose is to see every child live up to their life potential—we believe that many of our friends share this purpose. You can be part of Mildmay Uganda's friends who have committed to working with us to reach a child in our communities. **All our efforts matter to a child.**
